ACADEMIC DETAILS

SAVITRIBAI PHULE PUNE UNIVERSITY (All India Shri Shivaji Memorial Society's College of Engineering) Pune
Bachelor of Engineering (Computer) - Cumulative GPA: 9.42/10.00 *2023 – 2026*

GOVERNMENT POLYTECHNIC SHIVAJINAGAR PUNE Pune
Diploma in Engineering (Information Technology) - Cumulative Percentage: 91.20% *2020 – 2023*

MAHARASHTRA STATE BOARD OF SECONDARY EDUCATION (St. Francis De Sales High School**)** Pune
SSC (10th Grade) - Cumulative Percentage: 93.40% *2019 - 2020*

TECHNICAL SKILLS

Programming Languages: Java, Python, C++, PHP
Web Technologies: HTML, CSS, JavaScript, Bootstrap; **Databases**: MySQL, Oracle 11g.
Cloud & DevOps / Testing Tools: AWS, Git, Selenium, Postman
Applications & Tools: MS Word, Excel, PowerPoint, MS Projects.
Software & Platforms: Windows 10/11, Windows 2008/2012, Linux (Ubuntu), Redhat Server
Other: Testing, Data visualization (Matplotlib, Power BI), TinkerCad, Technical documentation & project workflow tracking

EXPERIENCE/INTERNSHIPS

Tester Intern, Apptroid Technology, Mumbai *Mar 2025 – May 2025*
• Conducted user interface testing across multiple modules ensuring usability and consistency.
• Executed functional test cases and documented defects for rapid resolution.
• Gained exposure to automated testing using Selenium.

E-learning Content Creator, GreyLearn, Mumbai *Nov 2024 – Mar 2025*
• Developed 15+ interactive e-learning modules.
• Streamlined content creation by reducing turnaround time through optimized workflows.
• Collaborated with SMEs to produce 10+ hours of digital learning content tailored for diverse learners.

Web Developer Intern, IndiaTechSoft, Pune *Jul 2022 – Sep 2022*
• Developed and maintained web applications using HTML, CSS, PHP, and MySQL.
• Tested web interfaces to achieve finest quality user experience.
• Gained experience in troubleshooting, debugging, and improving existing systems.

PROJECTS

Employee Burnout Prediction - Machine Learning *Sep 2025 – Oct 2025*
• Developed a predictive model using Random Forest to identify high-risk burnout cases with accuracy.
• Analyzed datasets to uncover key burnout factors and provided actionable insights.
• Built a web dashboard to visualize stress indicators and prediction outcomes interactively.

IoT-Based Smart Waste Segregation System - Internet of Things *Jan 2024 – Apr 2024*
• Integrated moisture sensors and a servo motor to automatically separate dry and wet waste.
• Designed control logic to detect waste type and actuate servo for proper segregation.
• Built a simple interface to monitor sensor inputs and system operation

Computing Infrastructure Complaint Redressal System - Web Development *Jan 2023 - May 2023*
• Designed the overall system architecture and database schema for a role-based complaint management portal using PHP & MySQL.
• Implemented automated notifications and workflow tracking, reducing issue resolution time.
• Created a responsive, user-friendly interface capable of working on variety of devices

Home Automation System prototype - Internet of Things *Jan 2023 - Apr 2023*
• Built an Arduino-based home automation prototype using PIR, ultrasonic, IR, LDR, and temperature sensors.
• Developed control logic for LEDs, buzzers, and relays to automate responses to sensor inputs.
• Created a simple interface to monitor sensor states and test system behavior.

PUBLICATIONS

Impact of 5G on IoT and its Challenges, International Journal of Scientific Research in Engineering and Management
ISSN-2582 3930 | Publication date: Feb 24, 2024 - https://doi.org/10.55041/IJSREM28726

AWARDS AND RECOGNITIONS

Winner | BloggerSpace |GDG AISSMSIOIT *Jun 2024*
• Selected among 200+ participants in Google Developer Students Club technical blog writing competition
